

Quality Policy

We at FUJI FILTER take our business policy of 'making our employees the happiest in the world', and will establish and realize a quality policy that will contribute to manufacturing in Japan and the world and will continue to manufacture the world's most exciting products.

1. We will accurately capture stakeholder* needs and deliver appropriate products to stakeholder of satisfaction.
2. We will contribute to the creation of a prosperous society by applying the technology cultivated through our experience in manufacturing high performance industrial filters in the development of products in new fields.
3. We will effectively utilize the quality management system for continuous improvement.
4. We will make efforts to improve quality through QC Circle Activities and Improvement Proposal Activities.

In order to achieve this quality policy, each department will set quality targets and make efforts to achieve the goal.
