

FUJI BEYOND

- Elastic and difficult to kink when bent
- Seamless
- Can be produced with highly chemical resistant special alloy.

Fuji Beyond is a flexible tube comprising a single wound seamless wire that can be made from various alloys. Unlike Fujiloy, which is sintered and strong, Fuji Beyond is flexible and elastic, causing it to have characteristics of returning its original form after deformed by external forces.

[Specifications]

Internal diameter	φ3.0-5.0mm
External diameter	φ3.5-6.0mm
Length	40-200mm
Material	SUS304, SUS316L, Ti, etc.
